WORK EXPERIENCE

10 AUG 2020 – 15 NOV 2021 – Iasi

Software developer intern C/C++

Continental

Analysis and solutions finding for encountered bugs on teams and client side.

Solutions implementation.

Analysis and testing PRs and implementing their solution if needed.

Implementing new functionalities.

EDUCATION AND TRAINING

1 OCT 2018 – CURRENT – Bulevardul Profesor Dr. doc. Dimitrie
Mangeron 27, Iasi, Romania

Student

"Gh. Asachi" Technical University of Iasi, Faculty of
Automatic Control and Computer Engineering

Operating with scientific, engineering and computer science
fundamentals.

Design of hardware, software and communications components.

Problem solving using computer science and engineering tools.

Design and integration of information systems using technologies and
programming environments.

Maintenance and operation of hardware, software and
communications systems.

Use of intelligent systems.

Programming: HTML, CSS, Javascript (front-end), Java (back-end) / React.js
/ Springboot Framework / Postman / Git / Object-Oriented
Programming / RESTful api / Agile (Scrum) / NoSQL (MongoDB)

PROJECTS

Bachelor's thesis

<https://github.com/letitiamunteanu/licenta>

The project I'm building is a medical website where patients can interact with doctors in a simplified way. Also, thinking about the problem that a lot of people encounters and I mean that they don't know where they should go for a medical consultation, I came up with a good idea to help them. So, they can introduce their symptoms and based on a machine learning algorithm which process this data, they will receive as answer the medical specialization where they should go.

About technical side this project is based on SOA. The backend is built using Spring-Boot framework, the security is assured by using Spring-Security and the symptoms are processed using Random Forest algorithm which forms a service built using Python and FastAPI framework. Also, the frontend is built using ReactJS library.

COMMUNICATION AND INTERPERSONAL SKILLS

People interaction

I'm a friendly person and I'm open to communicate with new persons. I usually manage to be liked by the others due to my personality and my funny way of being. Also, I love to help other people every time I can and I don't like to have a superior attitude towards others.

I have a team oriented behavior, I like to organize different events, I like to make the others interact as much as possible because I like to have a friendly and relaxed atmosphere in my circles of people. I am a very involved person in everything I do and I love to make new experiences and learn about new things all the time. I am a good listener and I like to give advices if I consider that my experience permits me to do that.
