Profile

As a teenage, I developed skills based on my activity as a professional volleyball player. After high school, I worked for four months in two different companies, so that I could pay the first tax for the college that I applied. Since I started college, I tried to focus on volunteering a little more, so I applied to UBB students organization, where at this time I am an active member of the HR department, and also member of the general assembly, witch means that along other members, we talk about most of the important decisions for our organization. Also, I graduated Bachelor Degree at "Babeş-Bolyai" University, degree in political science, more exactly, I am specialized in security studies, and did my bachelor degree on the subject of Human Security in Public Health.
